# Engine Oil Filtration

Anping Web Wire Mesh Co.,Ltd.

# Filter Elements & Screens for Engine Oil Filtration

## Introduction

Filter mesh and oil filters from WEB WIRE MESH are used in engine oil filtration systems.

Filtration of engine oil is the key process in the oil circuit. Oil filter is a filter element designed for removal of contaminants from engine oil, lubricating oil, hydraulic oil and transmission oil. The oil filter elements are used in many different types of machinery, such as motor vehicles' internal combustion engines, marine diesel engine and oil

lubrication system in operating equipments. The selection of a oil filter is based on the type of oil, the type of contaminant to be removed and the filtration conditions.

### Why you need filter engine oil?

Clean oil is very important for engine, it provides lubrication and cooling components, and if circulating oil can't remove impurities and combustion residues, it eventually will cause erosion and shorten the life of your engine. The oil filters play a major role in keeping engine oil clean and free of contaminants.

Idea for	Filter Elements	Features & Benefits

# Technical Parameters

## When ordering, please specify:

### 1. Types

Pleated oil filters, oil filter cartridges, SPL & DPL filter discs, cone type strainers

### 2. Filtration rating

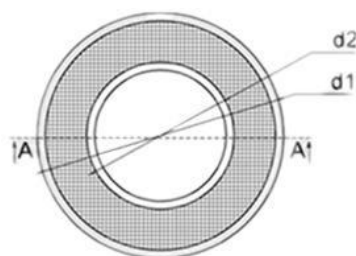

From 50 micron to 800 micron

### 3. Material

Stainless steel 304, 316L, 321

Pleated Oil Filters

SPL & DPL Filter Discs

#### Headquarters

Web Wire Mesh Co.,Ltd.  
No.12 Weier Rd.  
EZD Industrial Park  
Hebei, China  
Tel: +86 0318 7568801  
Fax: +86 0318 7568802  
Website: [www.webfiltergroup.com](http://www.webfiltergroup.com)

#### Branch

Web Wire Mesh Co.,Ltd.-SJZ  
NO 2701 CYC  
Shijiazhuang City
