# Filter Elements for Irrigation Equipments

## Introduction

WEB WIRE MESH can offer a range of high quality, cost effective filter elements for irrigation equipments. The filter elements are made of 20, 40, 60, 80 and 120 mesh stainless steel wire mesh, the stainless steel media has features of high strength, high toughness, and high wear and corrosion resistance.

The Irrigation inline Y filter strainers are fitted with various filter elements, they are installed between the irrigation valve and drip regulator to protect drip emitters, micro sprinklers, soaker hoses, mist systems from rust, sand and other impurities, which might avoid clog water distribution system. It is easily removed for cleaning by unscrewing the threaded cap.
