Sugar Filtration

Anping Web Wire Mesh Co.,Ltd.

Filter Elements & Screens for Sugar Filtration

Introduction

Sugar is produced from canes and beets, and sweeteners are produced from high starch products such as maize, potatoes, rice etc. The sugar filtration is a part of many procedures involved in the field of sugar processing.

The processes used to extract and refine the sugars require the use of various filtration and separation equipments.

The filter mesh and filter elements from WEB WIRE MESH can be used for sugar filtration to remove harmful contamination and to ensure maximum product quality at all times. The range of applications include:

- Glucose filtration
- Removal of activated carbon
- Hydrogenation filtration
- Polished filtration for final products
- Process water and condensate streams filtration

Technical Parameters

When ordering, please specify:

1. Types

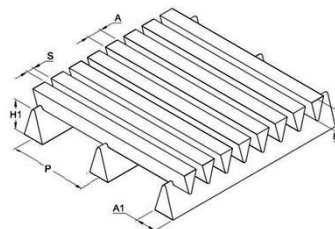

Filter discs, filter leaves, candle filters, rectangular screen panels, woven wire mesh tube, perforated metal baskets

2. Filtration rating

From 50 micron to 800 micron

3. Material

Stainless steel 304, 316L, 321

Wedge Wire Screen Panel

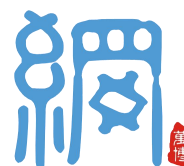

Filter Leaves
