# Filter Elements for Trench drain strainer

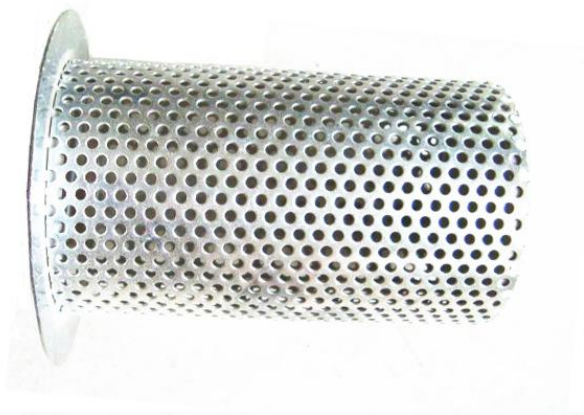

## Introduction

Trench drain strainers are also known as drain filter baskets, they are made of durable stainless steel perforated metal, expanded metal or wire mesh. The crossbar handle on top of strainer basket for easy inserts into and removal from the drains, while won't interfere with a grate which might sit on top of the trench.

## Why use strainer baskets in drains ?

Generally, drains clogs occur in many kitchens, grocery stores, meat processing plants and other industrial and commercial applications, due to most drainage grill allow large amounts of solid debris, food, meat scraps, trash and other debris to enter plumbing system, this will result in costly piping repair costs. So using strainer basket captures solids and debris from drains, to ensure continued functioning and longevity of the trench drain system.
