Wastewater Treatment

Anping Web Wire Mesh Co.,Ltd.

Filter Elements for Wastewater Treatment

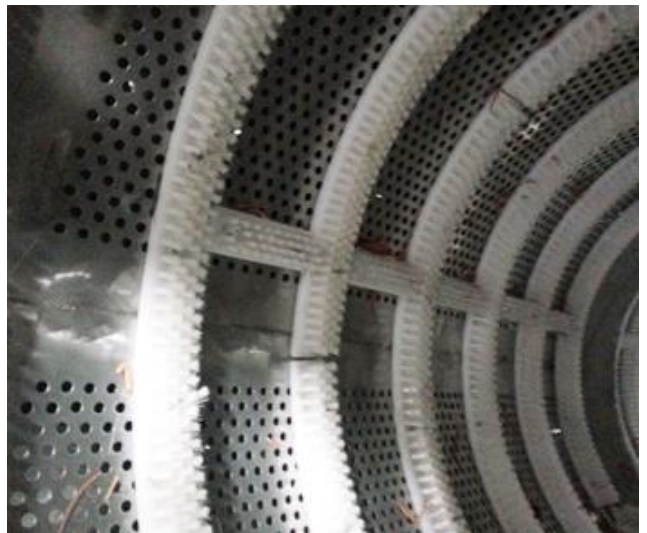

Introduction

The rotary drum screen are fitted with various filtration meshes from WEB WIRE MESH which be used in many different process stages in the waste water treatment. Woven wire mesh, perforated plate screen and wedge wire screen are the preferred filter media here. Perforated plate screen drum and wedge wire screen drum are commonly used for the primary treatment, wire mesh fine screen drum for tertiary treatment. Besides drum filters and filtration meshes, we also offer fine screen filter discs for wastewater treatment applications.

Why treat wastewater ?

Wastewater is any water that has been adversely affected in quality, which includes living sewage, municipal wastewater, industrial effluent and stormwater. Wastewater is full of contaminants including bacteria, chemicals and other toxins, if the wastewater drained directly without treatment or not properly treated, it will cause the serious water pollution, and a problem to people's health. Wastewater treatment can help removes as much of the settleable solids and non-biodegradable floatable as possible before the effluent is discharged back to the environment.

Idea for	Filter Elements	Features & Benefits
<ul style="list-style-type: none">• Municipal wastewater• Food processing• Paper making• Rayon and textiles process• Pharmaceuticals• Tanneries• Slaughter houses	<ul style="list-style-type: none">• Filter discs• Filter leaves• Woven wire mesh tube• Perforated metal cylinder• Wedge wire screen tube	<ul style="list-style-type: none">• High separation efficiency• Made of stainless steel• Low maintenance

Technical Parameters

When ordering, please specify:

1. Types

Filter discs, filter leaves, woven wire mesh tube, perforated metal cylinder, wedge wire screen tube

2. Basket Size

Diameter size range from 25 mm to 2600 mm

3. Material

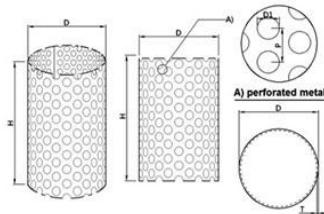

Stainless steel 304, 316, 321

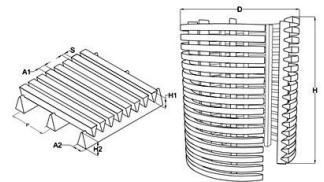

Filter Discs

Filter Leaves

Cylindrical Screens

Filter baskets
